## 1 Introduction

No one can escape death - but what happens to your crypto when you die?

According to [1], it is estimated that around 3.7 million Bitcoin are lost and unrecivable. One of the top reasons is death: crypto holders that pass away and failed to share access information with heirs will be responsible for inaccessible funds.

## 2 Appendix

# Appendices

Listing 1: Example JS snippet

```
1 // Example: simple function
2 function greet(name) {
3     return `Hello, ${name}`;
4 }
5 console.log(greet('World'));
```
